### 2. **ReconRaptor** - OSINT Recon Script (Python)
```python
ReconRaptor: Simple domain WHOIS and DNS record tool
import whois
import socket

def lookup_domain_info(domain):
 print("[+] Performing WHOIS lookup...")
 w = whois.whois(domain)
 print(w)

 print("\n[+] Resolving DNS...")
 try:
 ip = socket.gethostbyname(domain)
 print(f"Resolved IP: {ip}")
 except socket.gaierror:
 print("Error resolving domain.")

if __name__ == '__main__':
 domain = input("Enter domain to lookup: ")
 lookup_domain_info(domain)
```
